NDG West Coast US

AAA Client Name	Device Vendor	IP Address / FQDN
NYC1	TACACS+ (Cisco IOS)	1.1.1.1
NYC2	TACACS+ (Cisco IOS)	1.1.1.2

Notes:

This report lists the Network Device Groups (NDGs) that are configured within the ACS Database. This report is only supported if a ACS v4.0 (or later) package.cab was imported.

For each NDG the devices, vendors and address are listed. The IP Address may consist of several addresses, address ranges or FQDN style names (eg device1.extraxi.com). If NDGs are not in use all devices will be listed under the special ACS NDG "(Not Assigned)"
